

When my wife and I decided to purchase a new home we started the process of looking at homes and interviewing builders. When we first met with Clark Homes Mark was very cordial, friendly and courteous much like all the other meetings. As we narrowed our search Clark Homes began to stand out. So I decided to talk with several of my clients that are in the construction industry. They all had good things to say regarding Mark and the quality of his work.

With all the growth happening in the valley, I felt like many of the builders were more concerned with just building a house to keep up with the huge demand. Mark Seemed to take more interest and care in the building of each individual home he built.

As I watched our house and several other houses around us being built I started noticing the difference in quality. Mark was very much a hands on builder. He took the time to personally oversee and monitor the day to day progress. He would point out things and make changes when something just did not meet his standards. I am sure he drove his sub contractors crazy but I knew things got done properly the first time. This was apparent after our framing inspection was completed and the inspector took the time to write on the form "excellent frame job."

I am convinced it is Mark's pride in his work and the attention to detail that made all the difference. It has been a year now and I am hearing many of my neighbors and friends complaining about the problems they are having with their new home. They are constantly having to have someone come into their home to fix something.

We have been extremely pleased with the follow up we have received from Mark after the completion of our home. He has checked with us periodically over the past year to see if there was anything that needed to be done. The few times we did need something fixed he had someone there within a few days.

Mark's 20 plus years as a finish carpenter shows through in his work. I would highly recommend a Clark Home to anyone who wants a quality home done correctly the first time.
